[dany.a.seifeddine@gmail.com](mailto:dany.a.seifeddine@gmail.com) | +961 03004699 | [LinkedIn](#) | [GitHub](#)

Recent graduate with experience in Laravel framework, along with frontend skills in HTML, CSS, Bootstrap, Tailwind, and JavaScript. Familiar with React for building dynamic user interfaces. Eager to contribute to web development projects and grow in a professional environment.

## PROJECTS

### DS-Validation-Toolkit

- I built the Validator Toolkit using TypeScript and the Joi library, creating a robust npm package for validating strings, numbers, arrays, and objects. I designed core validation functions and customizable options, and it has been **downloaded by over 1,500 users** to streamline data validation in JavaScript projects. [npm](#)

### OpenBook

- I developed OpenBook, a Laravel-based platform offering free PDF books with features like user authentication, profile management, and robust search capabilities. I implemented a responsive design with language support for English and Arabic, integrated real-time comments using Ajax, and built an admin dashboard for full control over user profiles and book management. [github](#)

### OpenBook mobile application

- I contributed to the OpenBook mobile application by building it with Flutter and integrating it with the OpenBook website's API. I implemented core functionalities such as user login and registration, book viewing and downloading, and search capabilities. Additionally, I ensured the app supports multiple languages for a global user base. [github](#)

### CodeVerse

- I contributed to CodeVerse by developing and maintaining the platform for sharing and discovering frontend code snippets. I implemented features such as user submissions, snippet approval workflows, and profile management. Additionally, I worked on integrating a robust system for users to access and contribute to code snippets and tutorials. [github](#)

### CodeVerse

- I developed the Lebify Material UI library, providing over 200 pre-designed UI elements that can be styled with custom class names, eliminating the need for additional CSS or JavaScript. The library has accumulated over 500 downloads, with a daily average of 10 to 20 new downloads. [npm](#)

## EDUCATION

### Bachelor In Computer Science

Islamic university of Lebanon (IUL), Wardeniye

## **SKILLS**

Html, css, JavaScript, React, Angular, SQL, MySql, Php, Laravel, JQuery, TypeScript, Flutter, Dart, Git, Github, Linux, Postman, GitLab, Axios, Tailwind, Bootstrap, Problem-solving, Teamwork and Collaboration, Adaptability, Communication, Attention to Detail, Time Management

## **LICENSES & CERTIFICATIONS**

JavaScript Algorithms and Data Structures(Free Code Camp)  
Responsive Web Design (Free Code Camp)
